Handwritten text in Arabic script, likely a manuscript page. The text is arranged in approximately 20 lines, with some lines being significantly longer than others. The script is cursive and characteristic of the Ottoman or Persian periods. The page appears to be a single leaf from a bound volume, with some visible wear and discoloration. The text is written in dark ink on a light-colored, possibly parchment or paper, background.

IPSWICH PUBLIC DISPENSARY.

At a MEETING this day October 15, 1812, of the VICE PRESIDENTS, and GOVERNORS of this Institution,

THOMAS GREEN, Esq. Vice President in the Chair.

RESOLVED that the thanks of this Meeting be given to the Medical Gentlemen for the trouble they have voluntarily taken in forming the following Regulations for their attendance at the Dispensary, and that these Regulations are approved and adopted.

Signed THOS. GREEN, V. P.

At a MEETING of the MEDICAL OFFICERS of the IPSWICH DISPENSARY, holden this day October 12, 1812, for the purpose of filling up vacancies, and forming an efficient Medical Attendance,

J. THOMSON, M. D. in the Chair.

RESOLVED,

1. That the attendance be twice a week as before, every Tuesday and Friday at the Hour of Eleven.

2. That a Physician and Surgeon shall attend for two months in rotation, and that no inconvenience may arise from the occasional absence of the latter, an auxiliary Surgeon be appointed to supply the vacancy, proper notice being given by the Surgeon in Ordinary who cannot attend.

3. That the auxiliary Surgeon be the Surgeon of the succeeding period.

4. That the patients of this charity be transmitted to the succeeding Medical Attendants in rotation, without any reserve or exception whatever.

5. That a patient having received the advice and assistance of all the Medical Attendants in succession during the space

of six months, shall then be discharged, and not entitled to a fresh admission before the expiration of four months, except at the express recommendation of the Medical Attendant for the time being.

6. That a new book of Formulæ be composed without delay, in which simplicity, usefulness, and economy shall be consulted, and by which the Medical Attendants shall be governed in their prescriptions as much as possible.

7. That a majority of the Medical Attendants shall form a committee for the year, to examine quarterly the state of the medicines, and to give direction for any necessary supply or alterations.

8. That the medicines simple and compounded, shall be generally had from the Druggists of the place, particular articles being occasionally obtained from Apothecaries Hall.

9. That agreeably to the custom of all hospitals and dispensaries, no Medical man be elected to this institution in future, except in case of death, resignation, or removal of one of its members.

10. That any medical man offering himself a candidate, either as Physician or Surgeon to this charity, shall be deemed ineligible, unless he bring a certificate of his having a diploma from some university, or of having served a regular apprenticeship, and attended a proper course of public professional instruction.

11. That the above diploma or certificate be laid before and be approved by the Medical Officers.

12. That the Apothecary shall give notice to each Medical Officer, at least four days previously to his attendance being required.

13. That in all cases requiring medical or surgical consultation or operation, a

notice of four days, if possible, shall be given to all the Medical Officers.

14. That the chairman be requested to lay the above resolutions before the Vice Presidents and Directors, whose approbation shall be conclusive; and if the resolutions be approved, that they shall be inserted in the records of the dispensary.

Signed J. THOMSON, Chairman.

That the thanks of this Meeting be given to DR. THOMSON for his attention to the business of the day.

Signed W. H. WILLIAMS.

The Medical Officers who have offered their service consist of

DR. THOMSON.	MR. BARTLET.
DR. WILLIAMS.	MR. BROOKES.
DR. SPARKE.	MR. DENNY.

MR. MORGAN, House-Surgeon and Apothecary.

At a MEETING holden this day the 3d of November 1812, it was AGREED by the MEDICAL OFFICERS of the Institution, that the Principal Duties of the House Surgeon and Apothecary be as follows.—and that a paper detailing them be printed, framed, and hung up in the Committee Room, with the Resolutions of the 15th of October last.

W. H. WILLIAMS, M. D. in the Chair.

1. That the House Surgeon and Apothecary be in attendance every Tuesday and Friday at Eleven o'Clock precisely, when the Admission and Prescription Books, and the Pharmacopœia of the London College, and of the Ipswich Dispensary, be laid on the table in the Committee Room, which is to be the place of meeting for the Medical Attendants on all occasions whatever.

2. That he dispense all the medicines in the front room, which is to be considered the Apothecary's shop, where all medicines and medical utensils are to be kept, and in which the patients are to be bled, vaccinated, &c.

3. That he exclude from the Apothecary's shop, all medicines and medical utensils of every denomination, not actually the property of the Dispensary.

4. That he prescribe and administer such medicines as may be necessary for patients recommended on those days when the Medical Officers do not usually attend, giving them however early notice of any persons so admitted who are dangerously ill.

5. That he attend sick persons at their own houses, and perform any operation in or out of the Dispensary, when circumstances shall require his assistance.—Vaccination is included in this article.

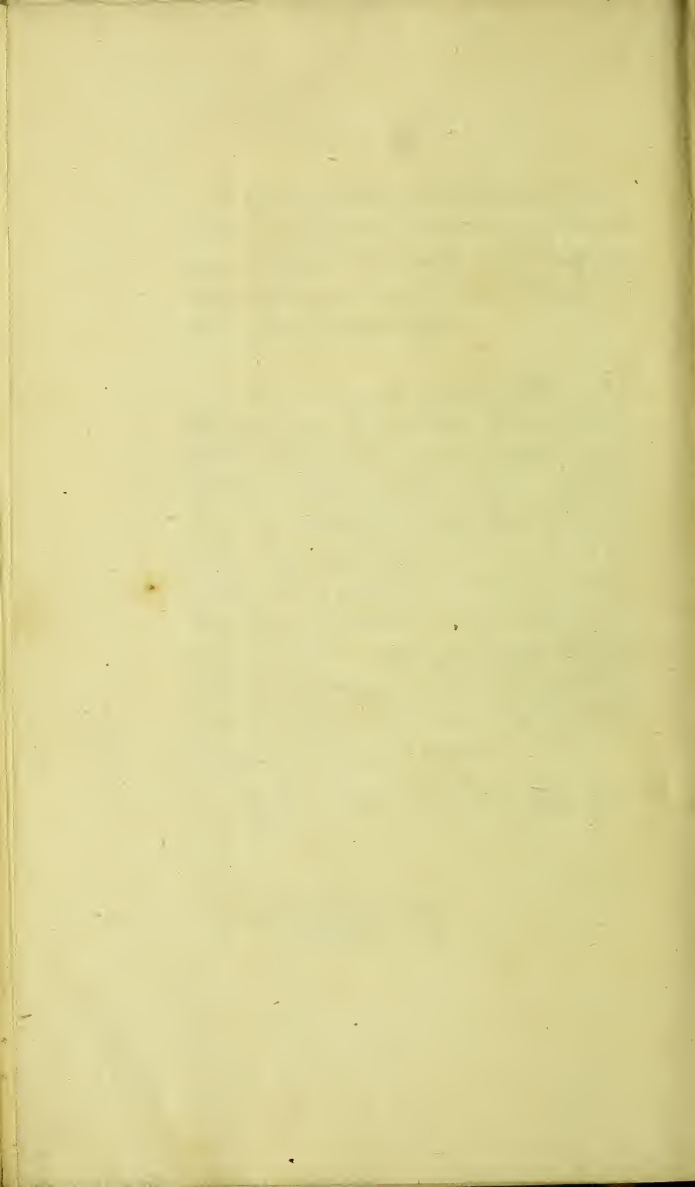

6. That he report to the Medical Committee any deficiency which may occur in those Medicines which are usually obtained from Apothecary's Hall, and which are to be ordered by them alone.

7. That in case the Medical Officers for the time being are prevented from attending the Dispensary at the appointed hour, he shall proceed, *after waiting half an hour*, to administer to patients then present, beginning with those whose complaints are the slightest and who have been longest on the books, leaving always the new patients or more important cases to be *last* attended to, that the Medical Officers in regular attendance may see and prescribe for them if possible.

Signed W. H. WILLIAMS, Chairman.
